INTERMEDIATE STEEL POST P2

The intermediate metal post “P2 profile” Dolmec has a particular shape that makes it very resistant to lateral and longitudinal torsion, and able to withstand the weight of trellising, grapes and wind force. The rolled edges are mechanical harvesting friendly. It's equipped with outside “S” hooks for movable wires to support foliage wall and central holes for fruit or cordon wire. The outside “S” hooks have special design preventing the wires from escaping. The distance and quantities of hooks and holes can be customized even for small orders. Line metal posts for vineyards P2 are available in different length. They can be produced in pre-galvanized steel Sendzimir Z275, Hot Dipped Galvanized steel, Weathering Steel (Cor-Ten) and Magnelis. The ideal solution for winegrowing, orcharding and fence making with the best value for money.
